# KRUGERRANDS

---

---

Since 1967, Krugerrands have set the standard in private gold investment around the world. Reputable dealers make trading in Krugerrands safe and predictable, but beware ..... there are fakes in the market traded privately and convincingly.

Finding out later that “the special deal” was a scam is a terrible outcome.

We recommend investors only deal with licensed, established bullion dealers and never allow a gold or bullion dealer into your house; that`s only looking for trouble.

At Goldex, we conduct a standard gold coin authentication test using the Fisch Fake Gold Coin Detector. We have been offered fake Krugerrands; they appear to be the real deal until we do “the ringer” test. That`s when the seller makes a hasty get-away.

Please keep your Krugerrands and jewellery safe and avoid the dodgy dealers whose scales read less than what they should.
