MAY, 2026

COMPANY NEWSLETTER

Greetings everybody, we trust you enjoy our monthly analysis of the gold and silver markets.

Sixty days have passed since the U.S. and Israel attacked Iran and it appears that war is now at a stalemate.

Gold and silver prices went down by 4% since March, but are holding steady. Currencies are also fairly stable..

Central banks, who previously hoarded physical gold in support of their economies, have eased off, while paying more attention to their energy requirements.

Should we buy, sell or hold bullion stocks? There are arguments for and against each of these actions, unfortunately there`s no clear road ahead like last year.
